

Double Wall Polyethylene Tanks

Part. No: 445 XXX

DESCRIPTION

Double-walled tanks made of high-density polyethylene (HDPE) for above-ground storage.

Compatible with diesel fuel, lubricants and various aqueous solutions such as AdBlue® and coolants.

Manufactured according to UNE 53432/92 parts 1 and 2, and EN 13341.

All tanks are supplied with a level indicator, and an alarm that appears in red in the event of detecting the presence of fluid in the retention tank.

The tanks can be installed on the outside as the outer wall is pigmented green with a special treatment against U.V. rays, which makes them resistant to prolonged exposure to sunlight.
